Dermal Fillers treatment

- Hyaluronic Acid Gel -

Facial Augmentation - Brow lifts. Smokers lines.
Lips. Cheeks. Chin.

- Treatment time -
30 - 60 minutes

- Treatment cost -
£150 - £1,000

Dermal Fillers

Dermal Filler injections consist of natural substances (hyaluronic acid) like those that exist in your body. Their purpose is to improve the appearance of lines and wrinkles on the face, by making skin smoother and improving volume. The effects of Dermal Fillers are instant and can last for 6 - 18 months.

If you'd like to restore youthful fullness to your face, enjoy plump lips, enhance shallow contours, have higher, fuller cheekbones or soften those facial creases and wrinkles, dermal fillers may be the answer. Dermal fillers have been called "liquid facelifts" because they offer many of the benefits of a surgical facelift without the downtime..

Botox

Botulinum Toxin Type A (Botox) is a purified protein produced by the Clostridium botulinum bacterium. It has been in use since 1978 to treat a variety of therapeutic areas such as eye squints, muscle spasm, Parkinson's disease, multiple sclerosis, facial spasm and cerebral palsy.

How it works?

When Botulinum Toxin A (Botox) is injected into the muscle it stops the muscle from functioning by blocking the chemical messages from the nerve to the muscle. If the skin is unable to crease, wrinkles are not able to further develop. However, the effect is temporary and function will return within 3-4 months.

Botox treatments

- Azzalure -

Improvement of facial lines around the eyes, forehead and brows

- Treatment time -
15 minutes

- Treatment cost -
£120 - £220

Profhilo treatment

- Hyaluronic Acid -

Restores the skins plump and firmness by stimulating the skins natural synthesis of collagen.

- Treatment time -
20 minutes

- Treatment cost -
£500 for two treatments one month apart

Profhilo

We start losing a significant amount of collagen, elastin and Hyaluronic Acid after we reach 30, which means we start to see the signs of ageing in the form of fine lines, wrinkles and slightly lack-lustre skin.

Profhilo® is most commonly used for facial areas but can also effectively be used for rejuvenating the neck, decollate, arms, knees and hands.

Increasingly, the neck is becoming a popular area to have Profhilo®, due to its ability to help reduce crepe-like skin and sagginess and encourage a firmer appearance.

The results from Profhilo® treatments will most often last for up to six months, but results can differ from person to person.

Micro-needling

It is a Collagen Induction Therapy (CIT) which is often referred to as Medical skin needling, Micro-Needling, Dermaroller and Vampire facial. Its aim is to stimulate the body's own collagen production to reduce the appearance of fine lines and wrinkles, stretch marks, skin laxity and scarring.

How it works

The treatment introduces a series of fine, sharp needles into the skin following the application of a local anaesthetic cream to reduce discomfort. The device is accurately moved over the surface of the skin to create many microscopic channels within the papillary dermal layer of the skin where collagen and elastin fibers are located

Micro-needling treatments

- Dermal stamp -
Collagen induction therapy
- Treatment time -
60 minutes
- Treatment cost -
£180

Fire & Ice facial treatment

- Medi Facial -

Reduces fine lines and encourages cellular renewal. Clinically proven to help treat medical skincare conditions - acne. Hyperpigmentation. Scar management. Rosacea.

- Treatment time -
35 minutes

- Treatment cost -
£80

Fire & Ice

Pioneered in Beverly Hills and coveted by A listers globally, this infamous intensive treatment is clinically formulated with the purest pharmaceutical grade ingredients and designed to rapidly and safely resurface the skin, reduce fine lines, address problematic skin and encourage cellular renewal.

This treatment is complemented by a unique combination of cosmeceutical serums & crèmes to guarantee one of the most effective results driven facials you'll ever experience.

Enerpeel PA

Pyruvic acid chemical peel in a patented Enerpeel® skin remodelling solution. It is commonly used to treat a wide range of skin issues, including fine lines, wrinkles, hyperpigmentation issues as well as oily skin. As it is contained in an Enerpeel® solution, any redness and erythema is much less in severity and duration, compared to many other chemical peels.

The result – Controls oily skin and photoaging which is premature aging of the skin caused by repeated exposure to UV sources.

Enerpeel treatments

- Enerpeel Pyruvic Acid (PA) -

Hyperpigmentation and fine lines

- Treatment time -
20 minutes

- Treatment cost -
£60

Enerpeel treatment

- Enerpeel Salicylic Acid (SA) -

Acne treatment

- Treatment time -
20 minutes

- Treatment cost -
£60

Enerpeel SA

Enerpeel® SA is a skin remodelling solution designed specifically for sufferers of acne, thanks partly due to the sebostatic (oil production reducing) effect of Salicylic Acid. The solution also contains the two active ingredients that are present in Aknicare® - triethyl citrate and ethyl linoleate - which were shown in a clinical trial by Professor Tony Chu to reduce the four main visible signs of acne.

Enerpeel® technology is a new, patented carrier solution which restrains the acids activity until it is absorbed. This is not buffering the acid and thereby reducing its activity; it is restraining it and then releasing it to accelerate through the skin, enhancing its activity.

Enerpeel PA

Enerpeel® PA is a version of the frequently used pyruvic acid chemical peel in a patented Enerpeel® skin remodelling solution.

It is commonly used to treat a wide range of skin issues, including fine lines, wrinkles, hyper pigmentation issues as well as oily skin. As it is contained in an Enerpeel® solution, any redness and erythema is much less in severity and duration, compared to many other chemical peels..

The result – Less Surface Trauma, Faster Surface Recovery with Erythema Reducing Rapidly. Enhanced Remodelling Stimulation.

Enerpeel treatments

- Enerpeel Pyruvic Acid (PA) -

Neck treatment

- Treatment time -
20 minutes

- Treatment cost -
£60

Enerpeel treatment

- Enerpeel Mandalic Acid (MA) -

Rosacea treatment

- Treatment time -
20 minutes

- Treatment cost -
£60

Enerpeel MA

Enerpeel MA is an exfoliating peel where the Mandelic Acid AHA molecule size means it is absorbed more slowly and hence does not trigger Erythema and therefore does not trigger excessive reddening or post inflammatory pigmentation, in fact it may act as a tyrosinase inhibitor and help control over active pigmentation. It can also be used as a pre peel similarly to Jessners.

It is known to be antibacterial and antiviral.

Enerpeel MA 40% will reduce the thickness of the stratum conium from 37 microns to 25 microns immediately after the peel and then it will reduce further over next 24 hours to 23 microns.

SkinMed

Tebiskin

Cellular Performance is Critical to Great Skin

Protecting and supporting cells and maintaining the health and integrity of key skin fibres of elastin and, collagen, supports skin tightness and structure.

Fibres for Strength, Elasticity and Firmness.

Sychrorose

The Rosacure® Rosacea Management system is specially formulated for rosacea sufferers and those susceptible to excessive blushing, flushing, thread veins and reddening skin. NEW formula has improved ability to raise skin tolerance thresholds to reddening triggers, like food, weather, UV. Effectively suppresses inflammatory reddening.
